## Clarmon and partner CSols will showcase QAvalid™ at Pitcon 2008 - Booth #5162

Clarmon Corporation will be presenting QAvalid, its advanced compliance management application at PITTCON 2008 at the Ernest N. Morial Convention Center in New Orleans, Louisiana, March 1-7.

QAvalid significantly reduces the time needed to produce and maintain documented evidence for validation, qualification and other compliance processes. Visitors will be able to see a live demonstration at booth 5162, where Clarmon and its U.S. partner CSols Inc. are located.

QAvalid is fully integrated with Microsoft Word and allows its users to work in a familiar way while providing all the benefits of a centrally controlled application. Related documents and processes are linked and content is controlled from creation and approval through to ongoing usage. Automatic audit trails, electronic signatures and a strong role based security model ensure full regulatory compliance.

### About Clarmon Corporation

Clarmon Corporation provides integrated software applications for the management of structured content within a number of target industries. Most of Clarmon's clients to date have been in the Pharmaceutical, Biotechnology and Medical Device Industries.

Through its QAvalid application Clarmon provides a powerful tool to allow companies to achieve regulatory compliance faster and easier. By removing tedious manual tasks for Quality Assurance, QAvalid drives costs down, and diminishes the risk of non-compliance.

Clarmon Corporation is headquartered in London, with a development and consultancy team in Bucharest Romania and sales staff in Dubai and Singapore.
